

COVID-19 Policies and Visiting Guidance For Full Life Care Volunteers

Updated 2/17/2022

Vaccination Requirements

- For volunteers, Full Life Care requires proof of vaccination against COVID-19, regardless of whether your service is provided in person, remotely, or a combination.
- For clients, Full Life Care does not require proof of vaccination against COVID-19, unless participating in a group setting at one of our facilities. However, we encourage full vaccination for all who are able.
- We highly recommend Booster shots for those who are eligible.

Considerations

- Your plans for friendly visits and in-person activities must adhere to visiting guidance provided below and on the next page.
- Beyond this guidance, respect preferences of the least risk-tolerant party, which may be you, your elder friend, their caregiver, or living facility
- No volunteer or participant is required to resume in-person activities at this time.
- Remote connections are always appropriate and may be your safest option, especially when outdoor options are limited.

In-Person Visiting Requirements

- Before in-person visiting, you must submit a volunteer health screening survey, in addition to completing a health screening survey via phone for the participant you are visiting (linked at the end of the volunteer screening, and available as a standalone link in your Better Impact volunteer profile).

Participant Health Screening Survey Link https://fulllifecare.formstack.com/forms/covid19_screening_clients
- Full Life continues mask requirements for in person service. Please use surgical or higher quality masks regardless of participants' vaccination status when visiting indoors and outdoors where social distancing is not possible.*
- No companions are permitted to join you during in-person visiting, unless registered separately as ElderFriends or Care Team volunteers.
- If you become sick after in-person visiting, notify staff.

In addition, please take steps to increase ventilation when indoors or sharing a car ride, by opening windows. Continue to practice good hand hygiene – before and after visiting, wash your hands or use hand sanitizer.*

* Full Life Care will provide PPE upon request, including required hand sanitizer and high quality masks, as supplies allow.

Participant Health Screening Survey Link https://fulllifecare.formstack.com/forms/covid19_screening_clients

Activity	Visiting Guidance
Phone and remote visits	Yes
No Contact or low contact delivery, porch visits and similar	Yes, if volunteer passes health screening
Outdoor visit -----	Yes, if both pass health screening
Indoor distanced visit	Yes, 1 time monthly, if both pass health screening Discuss with staff if you have a compelling reason to increase frequency of in-home visits before proceeding.
Community Outing	1 time monthly. Please contact staff. Both must pass health screening.
Give a ride	As needed for an approved outing or essential need. Both must pass health screening. Minimize time in the car, increase airflow, wear masks. Volunteer must have driving waiver and updated driving documents on file.
